• SERENOA REPENS (SAW PALMETTO):

It has an anti-inflammatory, anti-proliferative effects. It improves the symptomatology related to urinary tube ailments and the urinary flux.

• SELENIUM:

It is a powerful and natural antioxidant able to protect the cellular membranes.

It has also an anti-proliferative effect. High levels of selenium are able to slow down the progression of prostate cancer.

• LYCOPENE:

It is a natural antioxidant which helps to contrast and delay the onset of prostate cancer, reducing the oxidative damages, regulating the activity of carcinogens agents.

• ZINC:

It determines a reduction of the level of prostate DHT.

It contributes to reduce the dimension of prostate gland in patients affected by BPH.
