## A RELIEF FROM BABY'S COLIC

### PRODUCT CLASSIFICATION: Food Supplement.

#### ACTIVE INGREDIENTS:

- ◆ Colostrum **150 mg**
- ◆ Sodium alginate **75 mg**
- ◆ Lactase **25 mg**
- ◆ Lemon balm **15 mg**
- ◆ Lactobacillus plantarum (SGL07) **1.25 billion CFU**
- ◆ Bifidobacterium breve (SGB 01) **1.25 billion CFU**
- ◆ Fennel **1.25 mg**
- ◆ Coriander **1.25 mg**

**INDICATION:** In case of manifestation or persistence of infant gaseous colic.

**HOW TO USE:** Open the capsule and release the content in liquids such as water, milk, fruit juices, yoghurt and baby meals at room temperature (not more than 30 °C). It is recommended to take 1 capsule daily for 15 days. Repeat the treatment if necessary. We recommend to consult with your doctor first.

**PACKAGING:** 15 blistered dispersible capsules of 590 mg, inserted in a fold box with leaflet.

### COLOSTRUM:

*It protects the infant's gastrointestinal tract from viruses, bacteria, allergens.*

### LACTASE:

*It is an enzyme involved in the enzymatic hydrolysis of lactose into glucose and galactose and consequently it facilitates the digestive process.*

### B. BREVE and L. PLANTARUM:

*These two microorganisms contribute to strengthen the barrier effect and to contrast the microbial species involved in the baby colic.*

### SODIUM ALGINATE:

*When ingested, it reacts with the hydrochloric acid (HCl) present in the stomach and forms a protective barrier that is effective in preventing the gastroesophageal reflux.*

### LEMON BALM, FENNEL and CORIANDER:

*Promote digestive function, gastrointestinal regular motility and elimination of gases.*
