

CLIMIL[®]-PATCH

THE SOLE TRANSDERMAL PATCH WITH SOY AGLYCONES ABLE TO FIGHT HOT FLUSHES AND HEART PALPITATIONS

PRODUCT CLASSIFICATION:
Cosmetic.

ACTIVE INGREDIENTS:

- ◆ Soy Aglycones
- ◆ Ethoxydiglycol
- ◆ Humulus Lupulus Extract

HOW TO USE: 1 patch every 3 days.

PACKAGING: 10 patches inserted in a fold box with leaflet.

IDEAL FOR PEOPLE WHO:

1. Are subject to thrombolytic risk (i.e. obese women)
2. Do not tolerate OS therapy
3. Suffer from thrombophlebitis, high LDL-cholesterol and triglyceride levels

Pharmacological study*:

Assessment of the release of genistein and daidzein to skin.

G. Pirotta, P. Minghetti, 2005.

The transdermal patch has shown the capability of a protracted release. For this reason, it lasts for at least three days.

ISOFLAVONES RELEASE

Clinical study*:

Assessment of the efficacy of Climil Patch on menopause symptoms according to the Kupperman scale (medium score).

G. Parenti, 2004, F. Chiaffarino, 2005.

The intensity of menopause symptoms is reduced by 35% after three months of treatment, in patients previously treated by HRT (hormone replacement therapy).

SCORE ON KUPPERMAN SCALE
