### IRON EDTA:

*It has a bioavailability of 2 to 3 times higher in presence of phytic acid than iron bisglycinate and iron sulphate. It guarantees a harmonic absorption through the whole gastrointestinal tract. It does not cause organoleptic changes.*

*No contraindications.*

### VITAMIN C:

*It helps to improve the iron absorption by keeping it in the ferrous state (Fe<sup>2+</sup>).*

### FOLIC ACID and VITAMIN B12:

*These vitamins are required to synthesize DNA, produce normal red blood cells, repair tissues and cells.*
