- *Reduction in the vaginal secretion.*

HOW TO USE: *Use it undiluted like a normal soap or diluted in water.*

PACKAGING: *Flacon of 150 ml with a dosing pump inserted in a fold box with leaflet.*

MIMOSA TENUIFLORA:

It is a plant of Latin America with recognized healing, analgesic, antibacterial, antiviral properties. It helps to repair the epithelial cells also in presence of microulcerations.

SOY AGLICONES:

They enhance the trophism of the vulvo-vaginal tissues.

LACTIC ACID:

It helps to guarantee the right acidity of the vaginal ecosystem (pH 4.0 - 4.5), to fight the proliferation of the bacteria capable to modify its balance.

PIRUVIC ACID:

It helps to maintain the proper acidity of the vaginal environment, facilitating the process of transformation of the vaginal glycogen in acid lactic.
