HOW TO USE:

2-4 tablets/die under medical advice.

PACKAGING:

30 tablets of 1g each, contained in two blisters of 15 tablets each and inserted in a fold box with a leaflet.

ESPERIDINE, DIOSMIN

They are both bioflavonoids which facilitate restoring normal veins function by reducing their swelling due to inflammation.

RUSCOGENINE

The butcher's broom rhizome performs a protective function towards the blood vessels, phlebotonic (i.e. the ability to optimise the tone of the venous walls compromised by hemorrhoids).

BOSWELLIA SERRATA

Also known as the incense tree, it is a plant rich in triterpene acids (including beta-boswellic acid) which confer remarkable pain-relieving and astringent properties. It's useful in localized state of tension.
