

EUCIS-PLUS

**FOOD FOR SPECIAL MEDICAL PURPOSES INDICATED
FOR THE DIETARY MANAGEMENT OF HYPERHOMOCYSTEINEMIA.**

PRODUCT CLASSIFICATION:

Food for special medical purposes.

ACTIVE INGREDIENTS

- ◆ Betaine 250 mg
- ◆ Calcium L-5-methylfolate 800 mcg
- ◆ Vitamin B2 5 mg
- ◆ Vitamin B6 6 mg
- ◆ Vitamin B12 10 mcg
- ◆ Zinc 10 mg

INDICATIONS:

It is indicated for the dietary management of hyperhomocysteinemia.

FORMAT:

30 tablets

FOLIC ACID, VITAMINS B2, B6, B12

The introduction of folic acid and vitamins B2, B6, B12 decreases the plasma homocysteine value, bringing it back to the recommended reference values.

CALCIUM L-5-METHYLFOLATE

L5- MTHF, biologically active form of Folic Acid, is able, through the transfer of a methyl group, to reconvert homocysteine into methionine.

BETAINE AND ZINC

Betaine and zinc are cofactors in the transformation of the homocysteine, thus resulting in essential substances for the reduction of plasma levels of this amino acid.
