Only external use.

**Use it undiluted as a normal soap
or diluted in water.**

CALENDULA OFFICINALIS

A medicinal plant whose extract contains carotenoids, flavonoids and essential oils.

It has anti-inflammatory, antiseptic and soothing properties.

Its extract is a valuable aid in the treatment of skin irritations, redness and burning.

MALVA SYLVESTRIS

The leaf extract of Malva Sylvestris has a high mucilage content, which has the ability to create a protective layer that guarantees a soothing, moisturising and emollient action.

It also helps to moisturise, protect and decongest the skin, reducing redness and respecting the delicacy of intimate areas.

LACTIC ACID

It is able to rebalance the altered vaginal ecosystem and to reduce the vaginal pH to 4.5.

In such a way, it makes unfavorable the proliferation of the pathogens agents causing burning, itching and leucorrhoea.

OLIVE OIL

Reduces the surface tension of cosmetics and contributes to the even distribution of the product during use.
