

PECTIFLOR®

PREBIOTIC + PROBIOTIC IN EFFERVESCENT TABLETS

PRODUCT CLASSIFICATION:
Food Supplement.

ACTIVE INGREDIENTS:

- ◆ Inulin 3 g
- ◆ *Bacillus coagulans* 5 billion CFU*

TASTE: Light green apple

HOW TO USE: 1 effervescent tablet, a day, to dissolve in a glass of water, preferably in the morning.

INDICATION: In case of gastrointestinal disorders such as diarrhea (caused by antibiotics, bowel radiation, infections), IBS (irritable bowel syndrome), IBD (inflammatory bowel disease), intestinal constipation. Suitable also for women in pregnancy.

PACKAGING: 1 tube of 10 effervescent tablets inserted in a fold box with leaflet.

*Colony Forming Units

INULIN (THE PREBIOTIC):

*It is a vegetable fiber that favors the balance of the intestinal microbiota and facilitates intestinal transit. It helps to improve lipid profile and to reduce cholesterol and triglycerides serum levels.
It facilitates the mineral salt absorption.*

BACILLUS COAGULANS (THE PROBIOTIC):

It is a spore-forming bacterium. This characteristic makes it resistant to the action of: gastric juices and bile, temperature and mechanical stress.

in this way, the spores pass through the gastrointestinal tract and germinate in the intestine where they produce new bacterial cells.

*These contribute to the balance of the intestinal flora and to the inhibition of the growth of pathogenic microorganisms. *Bacillus coagulans* also has an immunoregulatory and antioxidant action.*
