SERENOA REPENS (SAW PALMETTO):

It has anti-inflammatory and anti-proliferative effects. It improves the symptomatology related to urinary tube ailments and urinary flux.

LYCOPENE:

It is a natural antioxidant which helps to contrast and delay the onset of prostate cancer, reducing the oxidative damages, regulating the activity of carcinogen agents.

SELENIUM:

It is a powerful and natural antioxidant able to protect cellular membranes. It has also anti-proliferative effect. High levels of selenium are able to slow down the progression of prostate cancer.

ZINC:

It determines a reduction of the level of prostatic DHT. It contributes to reduce the dimension of prostate gland in patients affected by BPH.
