

MARVIT®

Natur-Lax® Probio

TO REGULATE THE INTESTINAL TRANSIT
TO PROMOTE THE DIGESTIVE FUNCTION

PRODUCT CLASSIFICATION:

Food Supplement

ACTIVE INGREDIENTS:

- Rhubarb **120 mg**
- Senna **80 mg**
- R. frangula **80 mg**
- Cloves **20 mg**
- Verbena **20 mg**
- Dandelion **20 mg**
- Fennel **12 mg**
- Curcuma **10 mg**
- Caraway **10 mg**
- Star anise **10 mg**
- Mallow **10 mg**
- Cinnamon **8 mg**
- Bacillus coagulans 1 tablet contains **7 mg** of B. C. (=100 million)

HOW TO USE:

1-3 capsules a day in the evening, after dinner, with a glass of water.

PACKAGING:

2 blister da 10 capsules each, inserted in a fold box with leaflet.

RHUBARB

To stimulate the secretion of gastric juices and the intestinal peristalsis. To promote the motility of intestinal smooth muscles.

SENNA

To perform an elective tropism towards the large intestine. To enhance an activation of the peristalsis. The result is a natural laxative effect.

RHAMNUS FRANGULA

To stimulate the muscles of the large intestine regulating the intestinal functions and promote peristalsis. At level of colon, to inhibit the reabsorption of water and salts, favoring the production of soft stools.

CLOVES, VERBENA, DANDELION, FENNEL, CINNAMON, CURCUMA, CARAWAY, ANISE AND MALLOW

They contribute to improve the intestinal transit and digestive function, with a synergic effect.

BACILLUS COAGULANS

Bacillus coagulans has the function of creating a protective barrier inside the intestine, counteracting pathogens. They also contribute to the formation of lactic acid that normalizes the intestinal ecosystem and improves the immune defenses, consequently increasing the efficacy of the product. Furthermore, it survives from the action of temperatures, gastro juices and bile salts thanks to their spore-forming property.
